Oyster Workshop March 2014

Albemarle-Pamlico Nation Estuary *Partnership*

Mission

*To identify, restore, and protect the
significant resources in the
Albemarle-Pamlico estuarine system.*

Collaborative Actions for Protecting and Restoring the Albemarle- Pamlico Ecosystem

Sabrina Varnum, coordinator for the N.C. Oyster Shell Recycling program, left, and N.C. State videographer Jeff Robinson make an educational video atop a heap of more than 10,000 bushels of oyster shells at the Wake County landfill in Apex. The shells are collected from area restaurants and oyster bars and returned to the coast where they are strategically dumped in the water to provide habitat for future generations of oysters.

Objective C5: Restore oyster habitats to improve water quality and other ecosystem functions

Action C5.1: Construct new oyster habitats.

Action C5.2: Reduce the adverse impacts of harvests to existing oyster habitat.

Action C5.3: Facilitate research to improve oyster restoration technologies and methods.

Action C5.1: Construct new oyster habitats.

Oyster planting Carteret County, 1935.
